Tabletop Systems

Techno offers 6 sizes of their Tabletop CNC Routers. These convenient and compact-sized machines are compatible with most of Techno’s CNC accessories: Windows-based interface, industry standard G-Code, vacuum hold-down, additional axes, etc. If your application does not require heavy-duty routing, these machines supply a perfect option for expanding your business through CNC routing.

**FEATURES**

- Moving gantry provides stationary work surface
- Closed-loop servo control system
- Ball screws on all 3-axes
- Tool calibration touch pad
- Heavy-duty T-Slot table surface for easy part fixturing (vacuum table optional)
- Axis limit switches at all ends of travel
- Techno Windows-based G-Code Interface with free lifetime upgrades via the internet
“We manufacture Point of Purchase displays. Many of the pieces we fabricated in the past utilized an expensive CNC milling machine. The Techno router has provided us a much more economical and quicker method of producing the parts. The quality of the machine and the cuts it produces speak for itself. All it does is run! The machine is simple and easy to use; we've had no problems at all with the machine.”

Company: Alliance Display
Contact: Mitch Nelson
Location: Winston Salem, NC
Market: Point of Purchase Displays
Shop size: 8,000 sq.ft.
Customer: Since 2000
Model: Gantry III 067
