

ENCLOSURE CORNER 16 x 16

This structural profile is made of clear anodized extruded aluminum. Two slots are provided to insert 1.5 mm thick aluminum sheet stock. Specially shaped channels are available at each end of the extrusion. These channels are designed to be used with M5 self-tapping screws or tapped with an M5 thread. This profile is used to construct enclosures for mechanical or electrical components.

ENCLOSURE CORNER 16 x 18

This structural profile is made of clear anodized extruded aluminum. A slot is provided to inset 1.5 mm thick aluminum sheet stock. A T-nut slot is provided to allow a 1.5 mm thick aluminum sheet to be screwed to this profile. The T-slot is designed to accept a standard M3 nut or the M3 nut strip described in the accessory section. Specially shaped channels are available at each end of the extrusion to be used with M5 self-tapping screws or tapped with an M5 thread. This profile is used to construct enclosures for mechanical or electrical components.

In order to improve our products, we reserve the right to make engineering changes.
